

Native American diets and food practices have possibly changed more than any other ethnic group in the United States. Although the current diet of Native Americans may vary by tribe, and by personal traits such as age (e.g., young versus old), it closely resembles that of the U.S. white population. Their diet, however, is poorer in quality than that of the general U.S. population.

20" x 30" gouache' painting on illustration board and aCertificate of Authenticity.
